Technologies: Android, iOS, Health data integration

fennoma

Mobile Application Developer

July 2016 - December 2018 (2 years 6 months)

Buenos Aires, Argentina

In fennoma I've honed my skills as a mobile application architect. There were plenty of projects and each of them a chance to try something new.

- Started new Android and iOS projects. Brought maintenance and migrated some others.

Q4Tech

2 years 1 month

Mobile Application Developer

February 2015 - July 2016 (1 year 6 months)

Buenos Aires, Argentina

- Developed modules, functionalities and webservices on platforms Android/iOS (Swift + Objective C) for Essen App & Mobile.

Support Analyst

July 2014 - February 2015 (8 months)

Buenos Aires, Argentina

- Tracked and fixed bugs for applications developed under C# .NET, Android, iOS, Windows Mobile, Pocket PC and Win RT platforms. Took part on testing circuits as well.

Xerox

.NET dev

December 2012 - November 2013 (1 year)

Buenos Aires, Argentina

- Took part in the development, adapted, deployed and did maintenance of XPIM, a CRM application used to keep track of different kinds of documents on the corporative building.

- Surveyed and analyzed different functions in the mailroom system of the Supervielle Bank, took active part on its modifications.

- Worked in the creation of several modules, mainly in C# connected with SQL Server. Two of these able to detect document patterns and transfer and update data wirelessly between devices.

StarTechnology S.A.
